

*Potential Boundary Changes
Middle School Attendance Areas North of Mesa
Mall – Mesa 51 School District*

Shannon Bingham, Planner / Facilitator

1/27/21

Situation

- Relative school sizes among the three Mesa 51 full-sized high school buildings differs significantly and Grand Junction has an aging housing stock that produces fewer students
- The district has proposed a boundary change that would reassign portions of the Appleton Elementary attendance area to Pomona in order to balance enrollment and growth.
- The district has proposed the inclusion of the high school students in the Pomona boundary change area in the move so that high school students feed to Grand Junction High School.
- This change would further improve enrollment balance and allow students to attend closer to home and reduce future growth pressure on FMS

Situation (Continued)

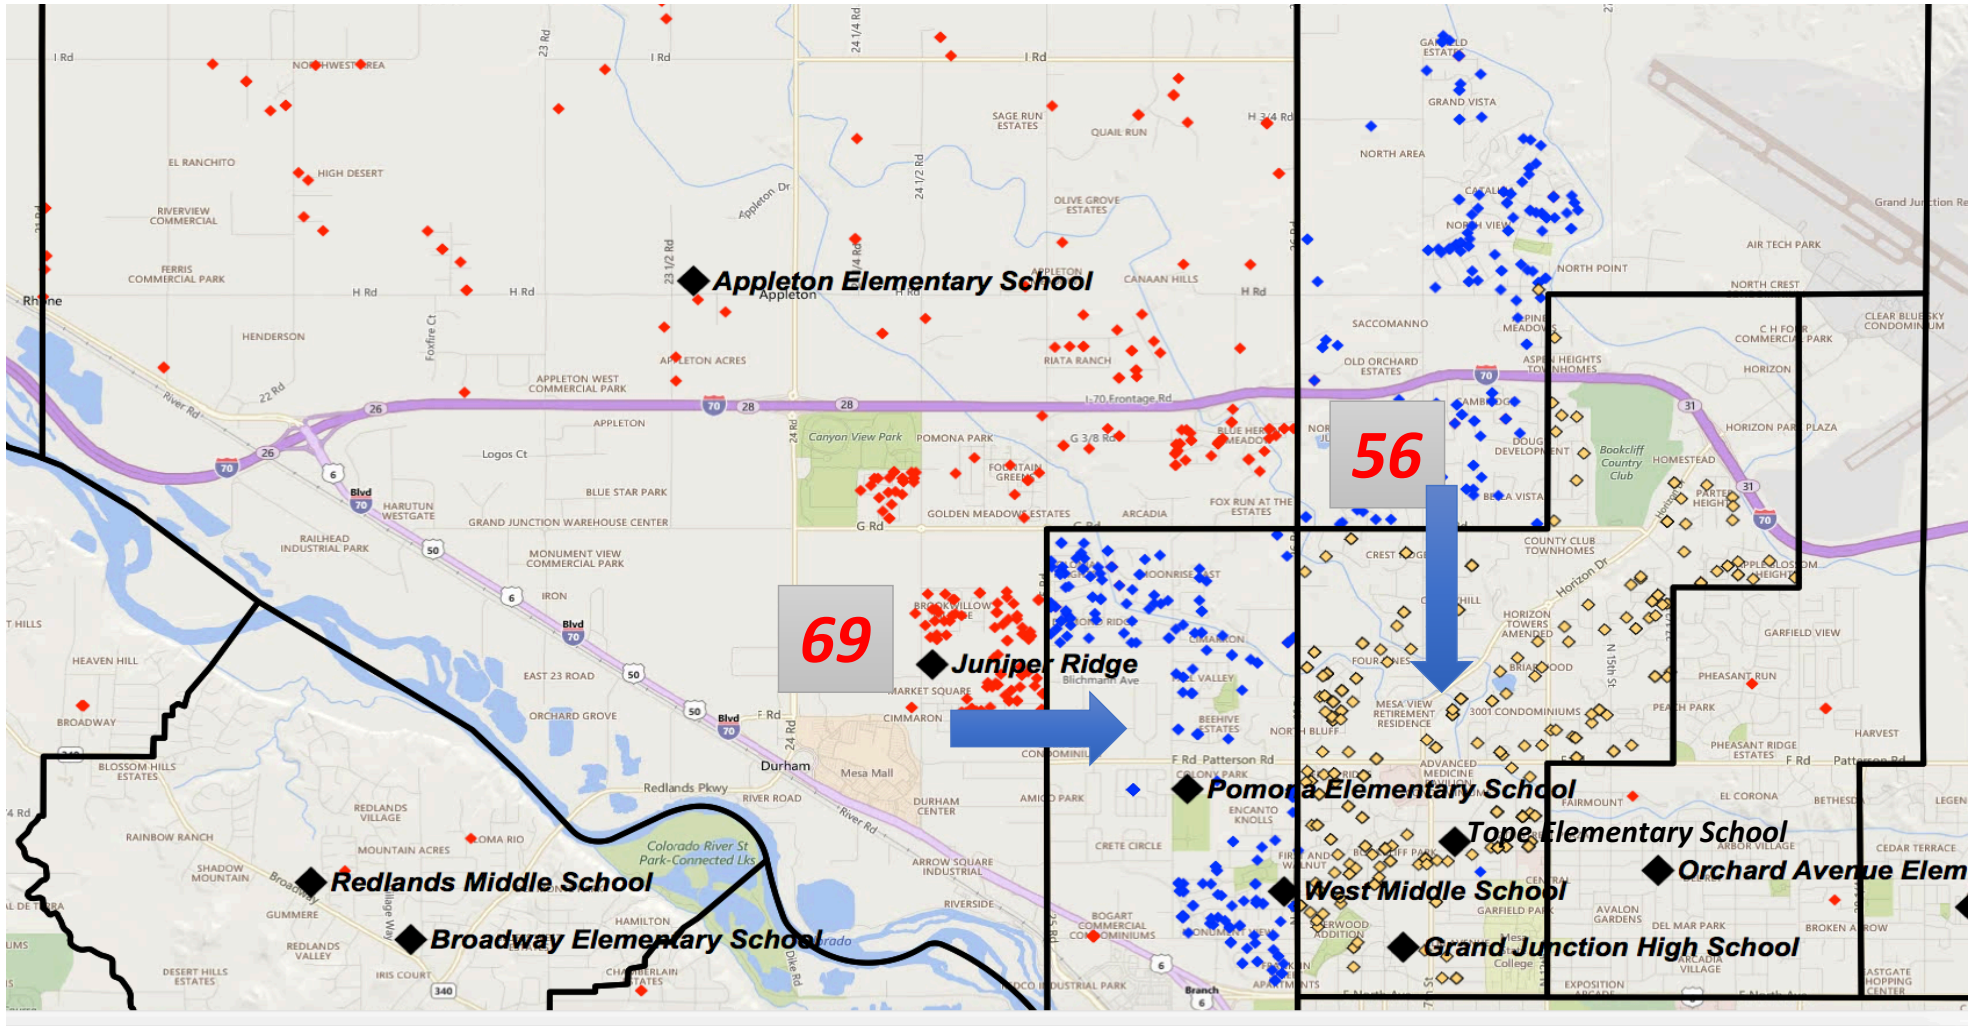

- Middle school assignment in the area is currently Fruita Middle for grades 6 & 7 and Fruita 8/9 for 8th grade.
- The transfer of approximately 38 - 52 students in the proposed area to West Middle School is proposed in order to complete the feeder to closer Grand Junction schools.
- Moving the southern portion of this area would clean up the feeder system and increase enrollment at West Middle School.
- The Board has requested that stakeholders consider this option

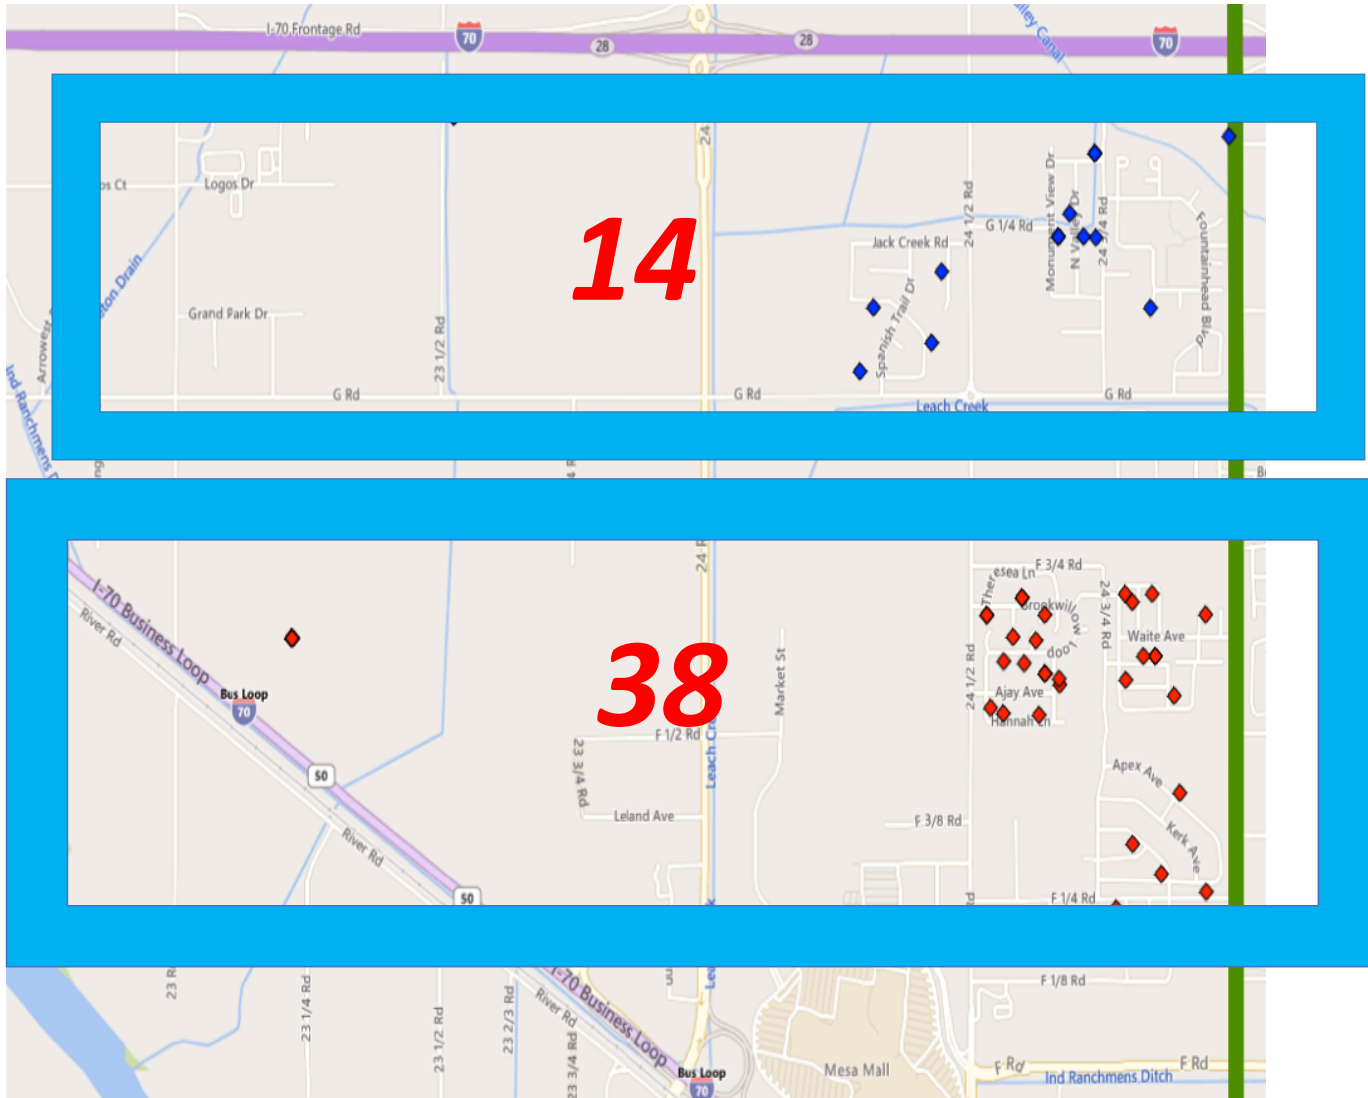

Potential Elementary Boundary Changes

Move 69 Students From Appleton to Pomona ES

Move 56 Students From Pomona to Tope ES

Current Appleton Students in Red, Pomona = Blue, Tope = Tan

Proposed Middle School Change -

Transfer the 38 middle school students south of G road and potentially the 14 students north of G road – from Fruita Middle including 8th graders at Fruita 8/9 to West Middle School

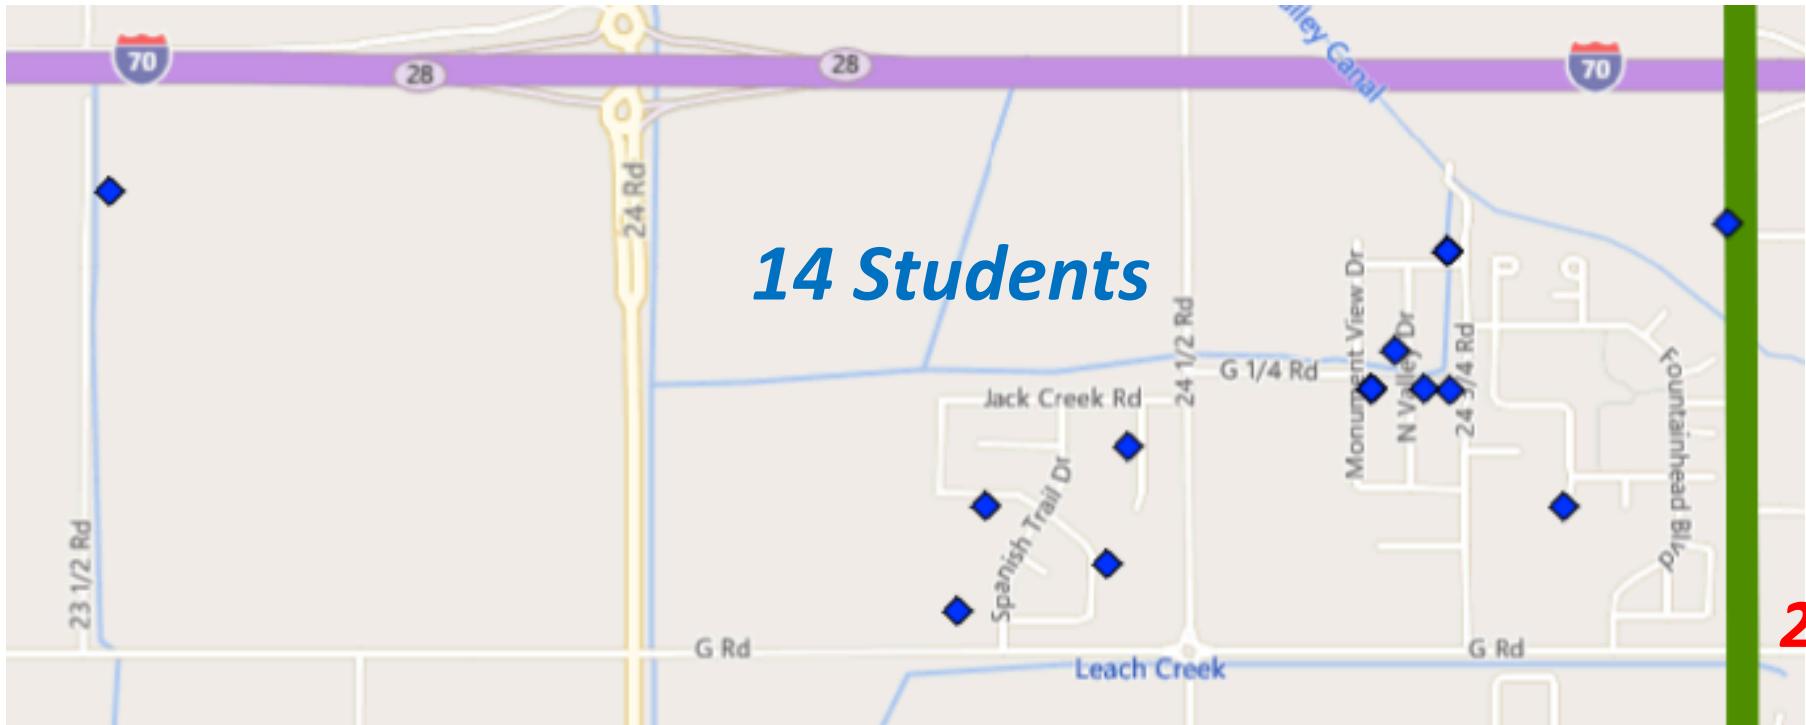

- Pros:**
- 1. Makes Feeder Consistent Given Pomona Boundary Change
 - 2. Additional Enrollment at WMS

- Cons:**
- 1. Additional Change
 - 2. Potential Transportation Costs

Next Steps

- The Change would be phased and would not affect students currently attending FMS or 8th grade students at the 8/9 school
- No decisions have been made
- Virtual parent meetings and a **survey** will help guide Board decision
- Transportation and grandfathering issues will be considered by the Board
- The Board will consider stakeholder input and make a decision in February
